

## Custom Landing Pages

Edit the layout of your folders and introduce your content to your colleagues, partners, and customers.

Follow the steps below to use Design Mode in your folders.

### Step 1

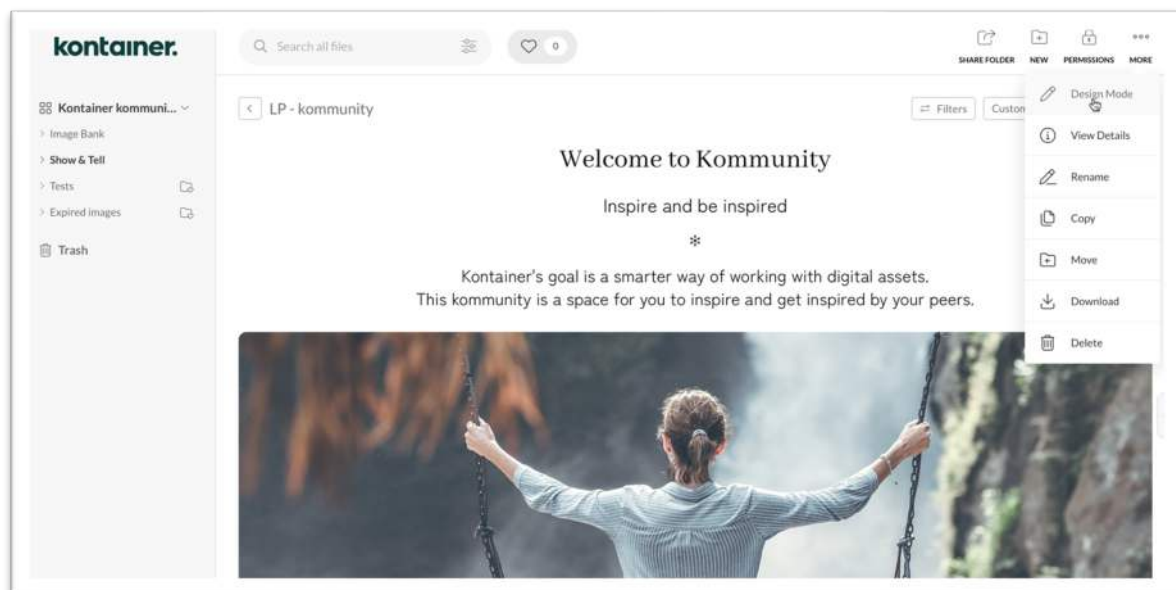

#### Open Kontainer and Folder

Login to Kontainer as an **Admin User** and navigate to the folder/page you want to edit.

### Step 2

#### Access Design Mode

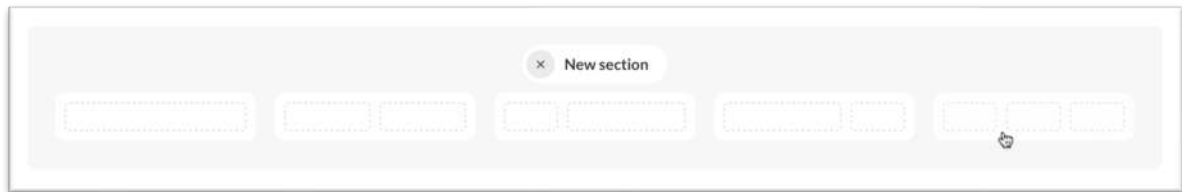

*Design Mode* is accessed under the *More* section of the top-right menu in your folder view.

## Step 3

### Add Section

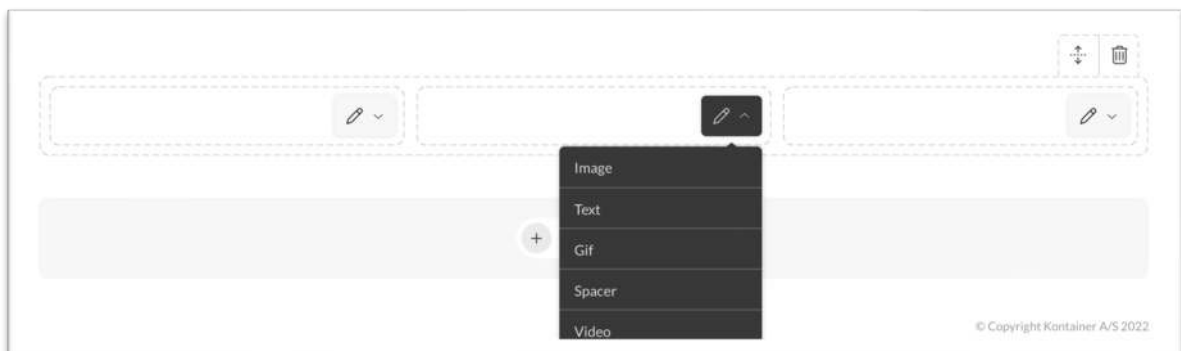

Once *Design Mode* is open, you can add sections of content boxes.

## Step 4

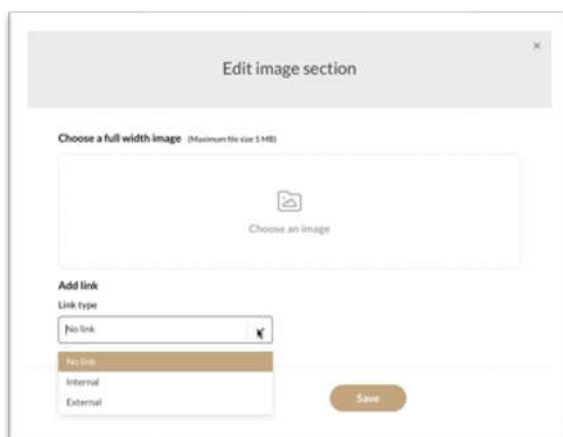

### Select Content Type

Select content type on each box in the section you have chosen.

## Image

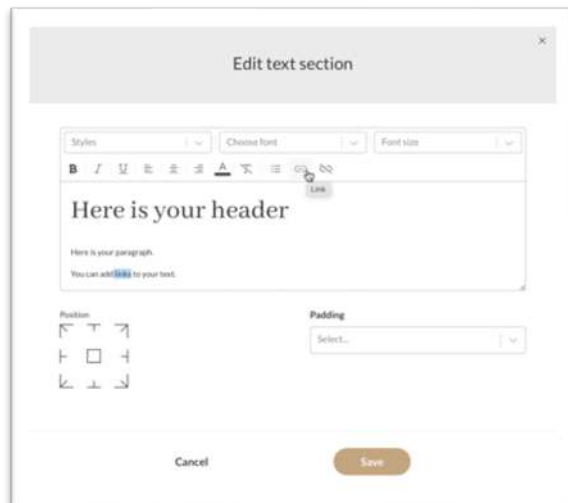

Upload images from your files and add internal or external links.

## Text

Add text to your page. You can custom format your text or use any text formatting presets from your Account Settings (Text Editor).

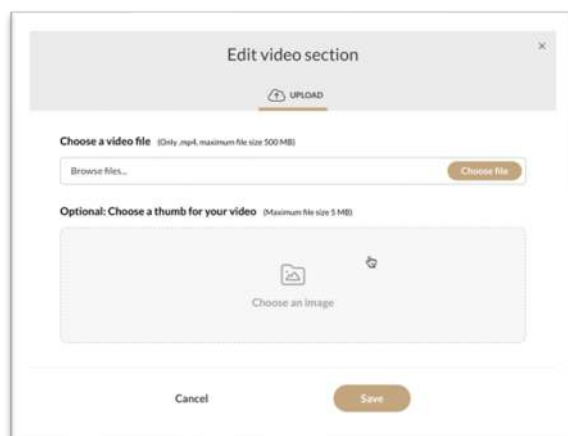

You can add links behind any text by marking it with your cursor and clicking on the *Link* icon.

## Video

When you add video, please be aware that it can take a little while before it's available for preview online.

If you don't like the preview image that the system selects, you can upload another thumbnail image to complete the page look.

- That's it, really. Let us know how you get on -
